Nancy

I (LUST Program) do not have any mine sites.

Subject: Are you working on any mining sites?

There is an effort underway to inventory all mining sites in R8. (This is part of a larger effort related to Gold King; Regions 9 and 10 are also inventorying their mining sites.)

Please let me know if you are working/involved with any R8 mining sites, and if so, the name of the site etc. I also need the names of any sites that are state lead. These would be mining sites where there is some sort of RCRA authority in play. I do not believe we have a lot to contribute to the exercise but for the sake of completeness I wanted to reach out to everyone with this question.

Please also reply with negative responses.

Mike, is there a database query that would verify this info?

A quick response is appreciated as there is a call at 4 pm today with EPR. Thanks in advance.

Nancy
